

# 6 Cleaning Tips

For Insanely Busy People

## 1. Involve your whole family

When you're busy, keeping your home neat and clean becomes nearly impossible. Simple tasks like making the bed in the morning can be managed by every member of your household, even kids.

## 2. Get used to quick cleanups

Arriving home after work to deep-clean doesn't sound realistic. You can avoid a messy home by cleaning for 20 minutes each day.

## 3. Keep cleaning supplies at hand

Keeping your cleaning tools close at hand is a great trick to simplify your tasks. Cleaning up a mess when it just happened is easier if you only need to search for supplies from a few feet away!

## 4. Rinse dishes after eating

If you usually hand-wash, soaking your dishes right away after eating prevents grime from sticking.

## 5. Get in the habit of putting things away

Keeping your home free of knick-knacks and stuff reduces the time you spend cleaning. Piles of clutter work like dust-catchers!

## 6. Invest in time-saving cleaning tools

Letting a vacuum robot clean your floors as you sleep can be what you need. The stores are full of time-saving cleaning tools like cordless stick vacuums or even robotic cleaners.
